## Therapy Animal Program

### How To Become a Therapy Animal Team

#### **Step #1: Determine if your pet meets the behavior requirements**

Dogs and cats must be 1+ years old, spayed/neutered, vaccinated, and free of infection. Dogs and cats must meet a variety of behavior requirements. A full list of requirements can be found on the back of this document or at [www.monroehumane.org/therapy-animal-program](http://www.monroehumane.org/therapy-animal-program).

#### **Step #2: Take a questionnaire to see if your pet is a good fit**

Complete the questionnaire at [www.monroehumane.org/therapy-animal-program](http://www.monroehumane.org/therapy-animal-program).

#### **Step #3: Complete Handler Training (\$30)**

To sign up for Handler Training, email Animal Program Coordinator, Sandra Groschwitz, at [sgroschwitz@monroehumane.org](mailto:sgroschwitz@monroehumane.org). This training is for handlers only and is intended to prepare handlers for the program.

Potential teams who complete Handler Training can sign up for optional prep classes to practice and master the behavior requirements for the Team Evaluation. Prep classes are available weekly. (\$10 each).

#### **Step #4: Complete Team Evaluation (\$30\*)**

Within 3-6 months of completing Handler Training, potential teams must be evaluated on all of the behavior requirements without the use of training tools or treats.

*\*Dogs who have a Canine Good Citizen Certificate or are an active therapy animal through a different program are exempt from the evaluation fee and are accepted into the program. Proof of status is required, and all previous steps must be completed.*

#### **Step #5: Complete Team Registration (\$100)**

After passing the Team Evaluation, potential teams need to pass a background check and complete paperwork before serving as an active team and providing visits in the community. Teams remain active in the Therapy Animal Program for two years.
